CONTENTS OF VOLUME 11

NUMBER 1, JANUARY 1968

WATERHOUSE, R. B. The Effect of Clamping Stress Distribution on the Fretting Fatigue of Alpha Brass and Al-Mg-Zn Alloy 1

LANDEN, ERNEST W. Slow Speed Wear of Steel Surfaces Lubricated by Thin Oil Films 6

ROUNDS, FRED G. Some Effects of Nonhydrocarbon Base Oil Constituents on the Friction and Surface Coating Formation Obtained with Three Additives 19

FOORD, C. A., HAMMANN, W. C., and CAMERON, A. Evaluation of Lubricants Using Optical Elastohydrodynamics 31

LAVIK, MELVIN T., MEDVED, THOMAS M., and MOORE, G. DAVID. Oxidation Characteristics of MoS_2 and Other Solid Lubricants 44

DI SAPIO, ALFRED, and MALONEY, JAMES. The Lubricating Performance of an "in Situ" Process MoS_2 Film in Air and in Liquids 56

TAKAGI, RIITSU, and LIU, TUNG. Lubrication of Bearing Steels with Electroplated Gold under Heavy Loads 64

ALEXANDER, DAVID L. Propagation of Surface Disturbances on Radially-Loaded Disks 72

HASS, HUGH S. Solid Film Lubrication of Worm Gears 81

NUMBER 2, APRIL 1968

BUCKLEY, DONALD H. The Influence of the Atomic Nature of Crystalline Materials on Friction 89

POWELL, D. G., and EARLES, S. W. E. Wear of Unlubricated Steel Surfaces in Sliding Contact 101

EARLES, S. W. E., and POWELL, D. G. Surface Temperature and Its Relation to Periodic Changes in Sliding Conditions between Unlubricated Steel Surfaces 109

TAO, F. F. The Role of Diffusion in Corrosive Wear 121

BOES, D. J., and CHAMBERLAIN, B. Chemical Interactions Involved in the Formation of Oxidation-Resistant Solid Lubricant Composites . . . 131

SCHULLER, FREDERICK T., ANDERSON, WILLIAM J., and NEMETH, ZOLTON. Experiments with Hydrodynamic Journal Bearings of Various Materials and Designs in Sodium at Temperatures to 800 F 140

BIEBER, H. E., KLAUS, E. E., and TEWKSBURY, E. J. A Study of Tricresyl Phosphate as an Additive for Boundary Lubrication 155

ALLUM, K. G., and FORBES, E. S. The Load-Carrying Mechanism of Organic Sulfur Compounds—Application of Electron Probe Microanalysis . 162

TALLIAN, T. E., and MCCOOL, J. I. The Observation of Individual Asperity Interactions in Lubricated Point Contact 176

NUMBER 3, JULY 1968

HSU, Y. C., and BURTON, R. A. A Study of the Interactions of Turbulent Shear Flow and Displacement Flow between Parallel Walls 191

MORI, HARUO, YABE, HIROSHI, and FUJITA, YOSHIO. On the Separation Boundary Condition for Fluid Lubrication Theories of Journal Bearings 196

CHIANG, T., and CHENG, H. S. An Analysis of Flexible Seal Ring Vibrations 204

BLACKSTONE, W. R., BABER, B. B., and KU, P. M. New Test Techniques for Evaluating the Compatibility of Materials with Liquid Oxygen under Impact 216

MILLIGAN, MANCIL W. Rarefied Gas Flow through Passages with Static Boundaries 228

STEIJN, R. P. Sliding Experiments with Polytetrafluoroethylene . . . 235

ANTLER, MORTON. The Wear of Electrodeposited Gold 248

HAINES, C. E., and DUFUR, C. W. Wear Coefficient Correlation of Test Methods and Design Calculations for Solid Film Lubricants 261

REICHARD, DAVID W., PARKER, RICHARD J., and ZARETSKY, ERWIN V. Studies of Rolling-Element Lubrication and Fatigue Life in a Reduced Pressure Environment 275

ERRATUM 281

NUMBER 4, OCTOBER 1968

DEVINE, M. J., CERINI, J. P., CHAPPELL, W. H., and SOULEN, J. R. New Sulfide Addition Agents for Lubricant Materials 283

HARRIS, T. A. On the Effectiveness of Hollow Balls in High-Speed Thrust Bearings 290

LAVIK, MELVIN, T., and MOORE, G. DAVID. Detection of Impurities in Synthetic Solid Lubricants 295

PAPE, J. G. Fundamental Research on a Radial Face Seal 302

PAPE, J. G., and VRAKKING, W. J. Viscoseal—Pressure Generation and Friction Loss under Turbulent Conditions 310
